

REPI at K2019 – Hall 6 Stand B24

AT K2019, REPI COLOURS SPEAK ALL LANGUAGES

The entire staff of the Group will virtually be at the booth to welcome visitors

What's behind a colour match or an additive formulation? There is a perfect match of puzzle pieces and this is possible thanks to people. Human capital is a crucial asset for a company, it's the spark generating great ideas and turning them into reality; it's what can make the difference. REPI people enable their colours to speak all languages. The entire Staff will be virtually at the booth to guide visitors through the product portfolio, made of high-quality colour and additive solutions for thermoplastics and polyurethanes applications.

Filling the missing tie...

Special focus will be on **REFIT®**, the newly launched company's vision regarding circular economy and sustainable growth. We see additive manufacturing as a great opportunity to fill the missing tie to foster the spread of recycling towards the realization of effective circular economies. This is at the basis of **REFIT®**. **REFIT®** involves all internal manufacturing processes and result in a range of solutions that cater for recycling of polymers.
