

COLOURS FOR POLYURETHANE FOAMS

This colour chart illustrates colours designed for the coloration of flexible, rigid and semi-rigid polyurethane foams.

Based on organic pigments dispersed in carriers, they are fully compatible with both polyester and polyether polyurethane foams.

Addition rates range between 0,1% to 5% on polyol, depending on the desired shade.

The illustration simulates shade and colour intensity at a concentration of 2%, at 40 Kg/m³ density.
