

COLOUR AND ADDITIVE SOLUTIONS FOR A CIRCULAR ECONOMY

REFIT represents REPI's vision on how to integrate technology into sustainability.

The **REFIT** range offers solutions to support and improve recycling of polymers.

This section shows additives and a selection of colours specifically developed for r-PET.

All shades are moulded on 50%RPET. The central layer (Layer 2) of each plaque shows the shade obtainable on a thickness of 0,25mm when dosing the liquid colour or additive at the indicated LDR.
