INTRODUCTION

At REPI , we are committed to conducting our business with integrity, transparency, and respect for our people and the environment. These principles guide not only our internal practices but also the way we collaborate with external partners.

The **Supplier Code of Conduct** sets out the standards of ethical, social, and environmental responsibility that we expect from all suppliers, contractors, and business partners who contribute to our value chain at all levels and in all our geographies. It is intended to complement our Code of Ethics, Whistleblowing Policy, and other company guidelines, ensuring consistency across all areas of our operations.

By adhering to this Code, our suppliers demonstrate their commitment to responsible business conduct, compliance with applicable laws and regulations, and respect for human rights, labour standards, health and safety, and environmental protection.

This document not only is a set of rules but also a framework for a long-term partnership based on trust, accountability, and shared values. We expect our suppliers to embrace these principles, to cascade them within their own supply chains, and to engage in open dialogue with us whenever challenges arise

REPI Mission is to create high value-added products and to provide superior services to customers in terms of R&D, prototyping, technical analysis, consulting and logistic support. In doing so we want to act in a manner that consistently reflects our values and demonstrates respect for all individuals involved in the process.
